SUMMARY

Data Engineer with 4+ years of experience building scalable ETL/ELT pipelines and data warehouse solutions using PySpark, BigQuery, and AWS. Experienced in optimizing distributed data processing workflows, improving data reliability, and automating data quality frameworks. Strong expertise in data modeling and implementing CDC pipelines to support analytics and business insights.

Currently on Subclass 485 visa with full work rights and actively seeking Data Engineer opportunities in Australia

DATA ENGINEERING EXPERIENCE

BNED (Barnes & Noble Education) LoudCloud PVT LTD | Senior Data Engineer

April 25 – June 26

- Optimized AWS Glue ETL pipelines by improving Spark transformations and job configurations, resulting in faster and more reliable data processing.
- Managed and monitored ETL workflows using AWS Glue, S3, and CloudWatch, ensuring high pipeline reliability and quick failure detection
- Performed root cause analysis on production failures, reducing recurring ETL issues and improving system stability
- Built and maintained scalable data ingestion pipelines for structured and semi-structured data
- Implemented data validation and reconciliation checks, ensuring accuracy and consistency across datasets

JIO Platforms Limited | Data Engineer

Nov 22 – April 25

- Built and optimized scalable BigQuery data warehouse, improving query performance and enabling faster analytics across large datasets
- Developed and maintained PySpark-based ETL pipelines using GCP dataproc and cloud storage (GCS) for ecommerce, financial, and user analytics data, ensuring reliable and efficient data processing
- Reduced data quality issues by 50% by implementing automated validation frameworks using Python
- Designed and implemented data ingestion pipelines using GCP Pub/Sub and Apache NiFi, supporting both batch and near real-time data from APIs, databases, and cloud storage
- Optimized ETL workflows and query performance, improving pipeline efficiency and reducing processing delays
- Partnered with analytics and finance teams to design data models supporting user behavior insights and campaign performance tracking

Facile Info-serv | Data Engineer

Oct-21 – Nov-22

- Automated ETL workflows using Python and PySpark, reducing manual intervention and improving operational efficiency
- Built and maintained scheduling and monitoring systems for ETL jobs, ensuring reliable and timely data processing
- Designed scalable ingestion pipelines integrating 1M+ data records into Elasticsearch, enabling near real-time analytics
- Developed API-driven data pipelines to ingest and transform data from external systems into Elasticsearch and BigQuery
- Built reusable data connectors for ingestion, transformation, and integration across multiple data sources

- Built data pipelines to process and prepare transactional datasets for fraud detection use cases
- Developed and deployed AWS-based workflows using AWS Fraud Detector, enabling real-time fraud monitoring
- Implemented data preprocessing and feature engineering pipelines to support model training and inference
- Deployed scalable data workflows in production, ensuring reliability and performance

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Big Data:** Apache Spark, PySpark, Hadoop, Hive
- **Cloud Platforms:** GCP (BigQuery, Pub/Sub, Dataproc, GCS), AWS (S3, Glue, CloudWatch)
- **Orchestration & Tools:** Airflow, NiFi, Talend, Alteryx
- **Databases:** BigQuery, Elasticsearch, MySQL, PostgreSQL
- **Data Engineering:** ETL Development, Data Modeling, API Integration, Data Quality Validation, CI/CD

QUALIFICATION

- Degree in Information Technology.
- Experience as a Data Engineer with a proven track record.
- Experience with performing analysis in a database environment.
- Ability to handle large volumes of data.
- Sense of ownership and pride in performance and impact on the company's success.
- Critical thinker, team player with good time-management skills.
- Great interpersonal and communication skills.

EDUCATION

Mumbai University, Bachelor of Engineering

Aug 2016 – June 2019

- Courses: Information Technology

MSBTE University, Diploma

June 2013 – April 2016

- Courses: Computer Engineering
